Write to U disk system

1.Download and install

1.1 Prepare a win10 system computer and a U disk (recommended 32G or larger).

1.2 Download the sytem image (it is recommended to download the Yahboom system image)
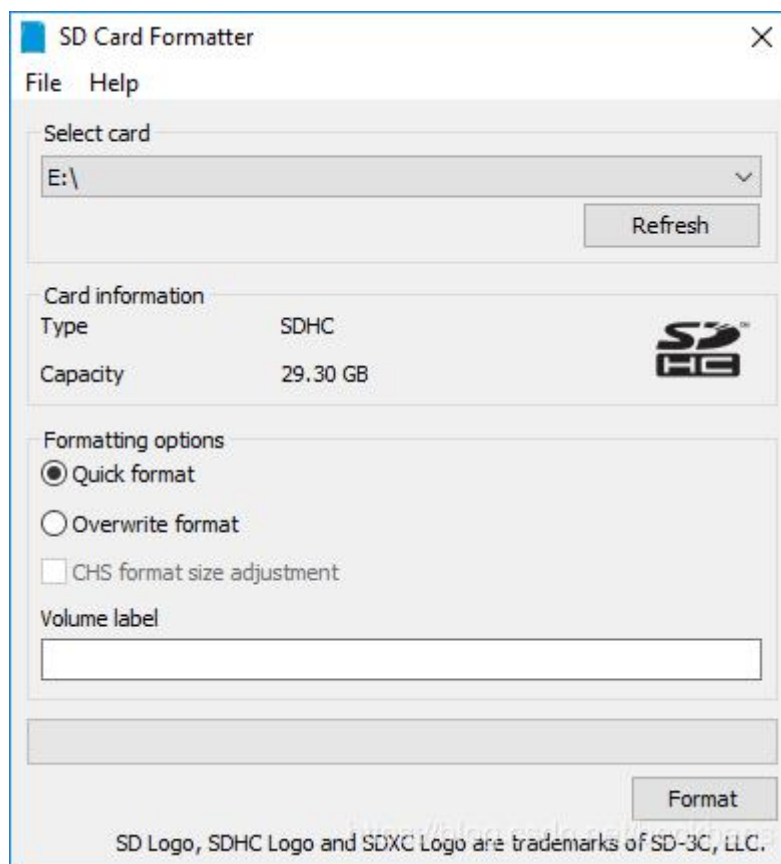

Do not download the official NVIDIA system image, it may not be able to boot due to configuration problems.

About system image file provided by Yahboom.

users name: jetson, password: yahboom

1.3 Format SD card

Format U disk by "SD Card Formatter.exe"

1.4 Extract image file.

You need to use 7Z software extract this zip or rar file.

7z software download link: https://www.7-zip.org/
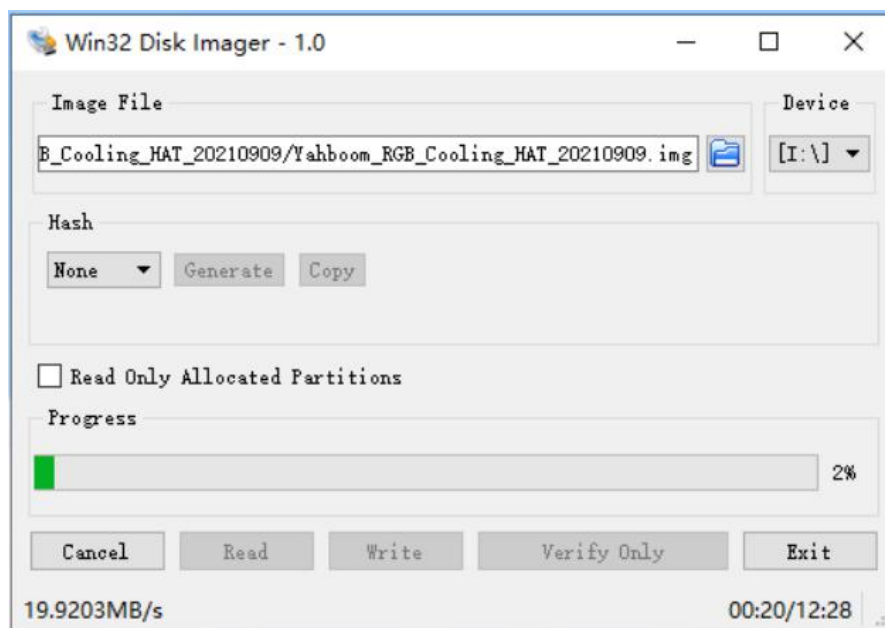

Then, you will get a folder include following file.

1.5 Insert the formatted U disk into the computer, write the .img file we provided to the TF card by win32 sofware.

This software download link: https://sourceforge.net/projects/win32diskimager/

Select the downloaded image file. Click "Write"

Click "Yes". Wait for the image be written into U disk.

1.6 When you see the interface as shown in the figure below, it means that the image file has been successfully written to the U disk.

1.7 If the computer prompts that the U disk needs to be formatted, click "Cancel".
